

SUMMARY

AI Engineer with hands-on experience developing and operationalizing end-to-end AI solutions across classical ML, deep learning, and generative AI, covering everything from data preparation to production deployment of RAG pipelines, LLM-powered applications, and model inference systems.

TECHNICAL SKILLS

Programming: Python, SQL, C/C++, Java, JavaScript, Bash
ML & AI: PyTorch, Scikit-learn, Pandas, NumPy, OpenCV
GenAI & LLMs: RAG, Vector DBs, Prompt Engineering
Databases: MySQL, PostgreSQL, SQLite, MongoDB
DevOps & Tools: Docker, FastAPI, REST APIs, Git, CI/CD

EXPERIENCE

AI Research Assistant Sep. 2025 – Present
Eötvös Loránd University (ELTE) Budapest, Hungary

- Build and optimize DP-SGD federated learning pipelines for privacy-preserving synthetic data generation ($\epsilon = 1$), engineering data preparation and feature workflows to benchmark privacy-utility trade-offs
- Author and teach the open-source IDaSec Practicum (8 labs) elte-dsed.github.io/Intro-Data-Security, documenting AI architectures and best practices in responsible AI
- Collaborate with cross-functional teams and mentor graduate students in AI engineering and MLOps workflows

Data Analyst Dec. 2024 – Mar. 2025
Djezzy Khenchela, Algeria

- Analyzed subscriber telecom datasets using Python and SQL to identify usage trends and customer behavior patterns
- Built automated data preparation and feature engineering pipelines, facilitating data-driven decision making and reporting
- Collaborated with analytics and cross-functional teams to model subscriber metrics and optimize customer retention strategies

PROJECTS

MyVellum  myvellum.me Dec. 2025 – Present
FastAPI, Groq API, LLM Orchestration, RAG, Docker, CI/CD

- Architected an LLM-powered app with modular prompt engineering, vector-backed RAG pipelines, and retrieval optimization
- Built automated evaluation gates into CI/CD for relevance and quality metrics; integrated Groq API and FastAPI with Docker

Facial Attendance System  [facial-attendance-system](https://facial-attendance-system.com) 2026
Next.js, TypeScript, FastAPI, DeepFace, Supabase

- Built a facial recognition attendance system with DeepFace-based verification and anti-spoofing liveness detection
- Implemented a Next.js frontend with a FastAPI backend and Supabase for secure attendance and analytics

EdgeOffloading-Agent  [EdgeOffloading-Agent](https://edgeoffloading-agent.com) 2026
Reinforcement Learning (DQL), Python, MEC

- Developed an agent-based system using deep Q-learning to optimize task offloading in multi-access edge computing
- Built a simulation environment to validate performance across battery, bandwidth, and task size conditions

EDUCATION

PhD in Informatics: Privacy-Preserving ML (GPA: 5/5) Sep. 2025 – Expected 2029
Eötvös Loránd University (ELTE) Budapest, Hungary

Thesis: Applied synthetic data generation for secure, privacy-preserving AI systems (Supervised by Pr. Lendák Imre)

M.Sc. in Artificial Intelligence (GPA: 3.7/4.0) Sep. 2023 – Jun. 2025
University of Khenchela Khenchela, Algeria

Thesis: Hair Dermoscopic Image Segmentation Using Deep Learning (Supervised by Pr. Dalal Bardou)

B.Sc. in Mathematics and Computer Science (GPA: 3.9/4.0) Sep. 2020 – Jun. 2023
University of Khenchela Khenchela, Algeria

Final Year Project: EVA, a learning management system for Algerian students (Next.js & TypeScript)  eva-web-snowy.vercel.app

AWARDS & CERTIFICATIONS

- **Stipendium Hungaricum Scholarship:** Fully funded PhD studies at ELTE Sep. 2025
- **2nd Place — Starthon'25 Hackathon:** University of El Oued, Algeria Apr. 2025
- **Software Engineering (Back-end Specialization):** ALX Africa (savanna.alxafrica.com/certificates/yNTLX6BYHR) Feb. 2025
- **AI Career Essentials (AiCE):** ALX Africa (savanna.alxafrica.com/certificates/YEM9LC5BNm) Jul. 2024
